The bark bone of the Zufu war is broken. Co). T. T. Crittenden has returned from Londvilla.

Cholers locantum is destroying the childrea in St Louis.

Sedalla is still batting for the right-railroads, and immigration.

500 emigrants arrived at New York on the 26 that and started West. Jefferson City railroad will be commenced

on the 15th of next mouth, The yellow fever is still raging in Mem-

phis and other southern cities, Steam boats and rullcoad trains are quar-

intined coming from the South. Louisville and New York have yellow fever among the refugees from the South.

Mossrs. Beunet and Farrow have purchased the Maries County Courier. Success to

The Secretary of War has employed a Uon federate Brigadier to revise the rules and regulation of the army.

The prospect now in that there will be a very large European demand for American bread-stuffs this season, and that the export of cereals will be larger this year than ever before.

The manager of the Lanterne News-paper, l'aris, has been sentenced to four months imprisonment and pay a fine of 4,000 france for on the brain; one who will combine Kansas publishing false news and libelling public tunctionaries.

tender of the little ones this bot weather: keep them dressed coolly, give their plenty good water, see that they sicep in a well ventilated room, but not in the draft, and have their clothing as loose and light about their bowels as possible.

Our representative in Congress from this district, Maj. Alfred M. Lay, is now almost completely restored to health. Long before Congress meets again in December every trace or vestige of disease will have been on. tirely eliminated. Youth, strongth and determination are generally victorious in a majority of struggles, and especially did they exercise their power in the case of Col. Lay.

Pleasant Hill Review: Missouri with its magnificent climate, unsurpassed richness of the garden of the State. This is what I am soil, its exhaustible mineral resources, its for, and this is the object the OSAGE VALLEY commercial facilities, its agricultural and Banner I sm sure will do all in its power to pastorial advantages, its excellent State government, with its bonds at a handsome premium, are elemental features that are bound in a short time to eplist the attention and

Eight million three numired and twentyone thousand three hundred and ninety-nine dollars' worth of school houses and sites is something that should kill half the lying enemies of Missouri with hate or jealousy. The \$2,320,430,20 paid the teachers annually is another bitter pill for the soured pointical dyspepties to swallow, while the revenue of \$3,424,408.55 is positively appalling. Sodalia Dem.

St. Louis Republican: The returns of collections are all in and the tootings show that the receipts of the public treasury for the past fiscal year amount to \$274,034,916. This is a vast com to be expended in the support of the general government, more nations. To unite the Kansas river by way than twice as much as is required for the of canal at or near Lawrence, Kansar, would support of all the stategovernments and estimated at about six dollars to every man. woman and child in the country. The peopie who shoulder this enormous burden year after year should get a great deal better past and present useless expenditure of monarticle of government than they do for their oy by the Government in wing and trail dam-

Numerous county immigration societies are being formed throughout the State, and it seems that a determined effort is to be made to secure our share of the home-seekers. if the landowners, corporations and individnals will move energetically, and will properly set forth the numerous advantages which Missouri possesses over rival States, there is no doubt but that the tide will turn in our direction. We have all that is needed save the energy, to advertise our bitate, and to secure the immigration, and we have too, about lived down the slander of our defamers,-Bolivar Herald.

Washington, D. C. July 21, 1879, The officers of the American Bankers' Association claim that their next meeting which will be at Saratoga on the 6th 7th and Sth of August, will be in the best sense a mooting representing the interests of all Pleasant Mt. We have some knowledge of the classes. With this and in view all financial institutions of the country will be invited to send representatives, and distinguished gentiemen from abroad will participate in the proceedings

The new daily paper to be edited by Mr. L. A. Colright late head of the Washington Bureau Associated Press, will appear here early in September. It will be independent in politics.

Rail Road Whistle!! Hearken!!

great mineral, limber and water region of Missouri to the Mississippi below freezing point, passing torough Miller county.

Joderson City with her broad guage passing through Miller county on the mineral, timber and water balt to Little Rock, Ark. paying mineral has been discovered within The trans-continental high way from St.

with five water powers sufficient to employ ritory. 100,000 men, women and children, all this and thousands of other benefits that are in store in thonear future, will make the Millerites Boom! Boom!!

Osage River.

Below we publish a letter from a distinguished gentleman residing in Central Missouri when at home; who is at Sour Lake, Terms for summer recreation:

Soun LAKE, TEXAL.

RD. BANNER:-An Igem I saw copied from your yaluable paper, that a steambout was aground above Tuscumbia and the river had rallen so that one could walk around it, bas induced me to give expression to the opinion long since entertained, that the only hope for the Osage Valley is in slack water navigs. tion. The river cannot be depended upon for navigation. Railroads cannot be constructed so as to snewer the purpose, and it is only by the aid of locks and dams that the wonderful resources of that matchies valley can be developed. Every other interest in the 7th district dwarfs into insignificance when compared to the accomplishment of making that beautiful river cavigable at all seasons of the year. I would ask no greater bonor, my ambition would be completely satisfied were I capable of working at that one object and could succeed in its final accomplishment. But it can't be done in a day, nor in one or even two sessions of Congress, it will require years of possistent work. We must have a capable and accomplished man, full of energy and system, who has the Cange and Missouri; and never cease asking and working, until his prayer shall be ruifilled; a man who will work for this object everlast-ingly, regardless of political bair splittings; one who has the interest of all his constituents at heart, and who firmly believes he can best save their interests by locking and daming the Osago river. A member from the 7th district identified with the Ossgreriver improvement, and who will work for this object as the one purpose of his life, AND THEN KEEP HIM IN CONCRESS UNTIL HIS TASK IS PERFORMED. Let him work for money enough to build one lock and dam-commencing at Shiply's of course, and then another and another until the Geage Valley shall bloom and blossom as the rose, and produce its countless thousands of tons cereals and minerals, and make Southwest Missouri promote. Success.

We have for the last three years and over presented to the public and held before the eyes of members of Congress and State Legconsideration of the capitalist and home seek- islators the all important subject of improving the Osage river, we have suggested ditferent plans by which the river can be atilized for not only the blessing and comfort of the people immediately in the yalley, but for the entire States.

> There is not a neighborhood north, south, east or west in this broad land, even in the old World but that the valuable timbers, miner als, machinery, implements of household, and farming utensils manufactured at these water powers on the Osage, would seak a place for the comfort and blessings of man. The four hundred miles in the richest agricultural lands in the world tying contiguous to and along the banks of the river, with thousands of miles in the valleys of its tributaries are sufficient to produce bread to subsist many give water transit to Southern Kinsas, New Mexico and Southern Colorado.

slack-water is only a question of time. The ing the river does no permanent goo. the sooner it is stopped the better. Twenty-five or fitty thousand dollars from the U. S. Government to purchase material; the labor of two hundred convicts one your by State aid and a small pitence from each county in Osage Valley when the work is being done will be sufficient to eract one lock and dam. Prosecute the work in this way, in a few years the valley would "bloom and blossom" as a well cultivated garden from the Capitol of the great State of Missouri through Kansas to Colorado and New Mexico, connecting the great valley of the Mississippi with the rich gold and sliver mines in the West.

Rail Road.

The Jefferson City & S. W. Railroad company has accepted Col. W. S. Popu's proposition to build the road to the Cole county line near Russelville, within eight mile of typeography of the country between the two points above mentioned, and from others who reside in the neighborhood we are assured that the most practicable and cheapest route to build the road will be via Pleasant Mt. and Rocky Mt. to Versailles; which route would pass directly through the lead and timber region of Cole, Miller and Morgan counties; the other route via High Point would be diverging from these two great objects of freight for the road. Besides this the line of road would be to Pleasant Mt. on Sedalia on her narrow guage, through the the mineral region, which in time will inevitably call for and build a road southwardly to Little Rock, Ark. Any one who will look at the map of the country and trace the North and South mineral belt in the states of Missouri and Arkansas, will find that the from 24 to 30 miles extending from the Louis to San Diego on the Pacific, with Missouri river to Hot Springs, Art; within reil, furn-pike and common roads connect- ranges 13 to 17 W. P. M. The E st and

Osago river, washing 80 miles of Miller the Pacific, pames along the Owark mountain county soil, passing through the center of range to where it connects with the north the County, with slack water navigation and south beit in the western states and ter-

> To locate a railroad, it seems to us that, the main object would be to pass it through a region or from one point to another that would afford sufficient transit to yield an income to pay a reasonable per cent on the cost of construction; the route we have inwill keep within the mineral and timber belt above mentioned and the two main objects will be attained; because it supplies a vacant link in the chain of railroad; from Western point

Lake Superior and the starting point of the northern U. P. Rosd; to Galveston and New Orleans on the Gulf of Mexico.

Connecting as it were the northern pine ries and fishries with the tropical trults, cotton and sugar plantations in the routh.

The live people of idedalia are already on a chain of railroad from the north to Galveston on the Gulf; but the far seeing people of that city doubtims have well matured the millions of mineral and timber wealth within the belt of country north and south above mentioned, and are determined to build a road to Warsaw, which when done, will never go west, but will make for Lattie Rock, Ark.

Most likely when they reach the Oxerk mineral belt will extend a line exit to the Mississippi below freezing point connecting with New O leans and all the southern railways. The Jefferson City people seem to have had their southern eye closed and are viewing the sun set region with one eye between the two great rallways, which route will never pay the grease to operate it. Torn South gentlemen, where each mile of read will be furnished with mineral and timber sufficient to fill your coffers to overflowing,

-Hon. Heavy V. Warren Rop. of Maries county was, seriously injured by the explosion of a gun, last week.

-John Marrison of Roware county, son of the old reliable Alfred, is a prominent man for the coming Tressurer.

-John Walker of Howard county is looking after the next Governorship

The wear and toar of business life makes tremendious drafts upon body and mind that without recourse to some sustaining agent they must give way under the pressure. To those who are breaking down; or wasting from general debility or affections of the liver, stomach and the kidneys; a systematic course of the Bitters will so reinforce the vital junctions us to bailt all the magnitude of disease and restore the system to its wont-

ed health.
